**JSERIES FLOAT SWITCH
JX SERIES JUNCTION BOX & LIQUID
LEVEL FLOATS**

Stancor provides a corrosion resistant NEMA 4X enclosure for your junction box float switch tie in. The box is constructed of Noryl, with minimum wall thickness of 1/4".

All float switches include these important features:

- Rugged steel bodied, hermetically sealed mechanical switches
- Switches epoxy potted in high impact polystyrene or ABS Floats to completely seal out all liquids and contaminants
- Steel switch centered in the float assures positive switch alignment and makes the switch axially non-position-sensitive

The Stancor Series Float Switch provides automatic pump operation by directly plugging the pump plug into the piggyback plug.

Features:

- Directly controls pumps up to 2HP - no control panel is needed
- Small enough to operate where space is limited
- Epoxy sealed switch and cord conductors
- Adjustable pumping range
- Entire unit UL listed and CSA certified
- ABS float good for liquids up to 200 degrees F
- 2HP (230V-1 phase), 1 HP (115V-1 phase)
